FRANCE has ratified several important international anti-corruption conventions such as the OECD Convention on Combating Bribery of Foreign Public Officials in International Business Transactions and the United Nations Convention against Corruption. In general, investors do not consider corruption a problem for doing business in France, and companies operating in France generally have a good reputation of corporate social responsibility.

'UNE AFFAIRE ATOMIQUE : UraMin/Areva, l'hallucinante saga d'un scandale d'Etat' (An atomic case : UraMin/Areva, the incredible saga of a state scandal) by Vincent CROUZET (Robert Laffont Editions). The Author is well-known for having already published, since 2003, Five Spy Novels. The latest one 'Radioactif' (2014) was dealing with the famous scandal regarding AREVA (Multinational French Energy Sector Company) being a 'victim' of an international financial scam. This time, it is as a narrative non-fiction format. Respecting his style as a novelist, he takes us inside the dangerous world of Finance, Politics, Business and Corruption. From his own experience, he became a unique witness and testifies openly with an incredible precision.

AREVA's publicly declared operations : AREVA supplies high added-value products and services to support the operation of the global nuclear fleet. The company is present throughout the entire nuclear cycle, from uranium mining to used fuel recycling, including nuclear reactor design and operating services. AREVA is organized into two main activities, with New AREVA (NA) and AREVA NP (NP). New AREVA includes all of the fuel cycle activities. New AREVA, refocused on the production and recycling of nuclear materials and waste management, will develop its activities in mining, uranium chemistry (conversion and enrichment), used fuel recycling, logistics, dismantling and fuel cycle engineering.
